JOURNAL OF ELECTROANALYTICAL CHEMISTRY

Vol. 333 Nos. 1 and 2 25 AUGUST 1992

CONTENTS

Application of cyclic voltammograms under mixed spherical/semi-infinite linear diffusion at microdisk electrodes for measurement of fast electrode kinetics
I. Lavagnini, P. Pastore and F. Magno (Padova, Italy) 1

The long-time transient of two- and three-dimensional diffusion in microelectrode chronoamperometry
C.G. Phillips (London, UK) 11

Polarography and anodic stripping voltammetry of metal–polycarboxylate complexes: phenomenological relationship between limiting currents and hydrodynamic mass transport
J.M. Díaz-Cruz, C. Ariño, M. Esteban and E. Casassas (Barcelona, Spain) 33

Studies of electrodeposition of nickel: different nickel(II) and sulphonated additive concentrations
E. Gómez, C. Müller, R. Pollina, M. Sarret and E. Vallés (Barcelona, Spain) 47

Electrodeposition of platinum and palladium particles into base-hydrolyzed cellulose acetate films. Electrocatalytic/permselective surface microstructures
J. Wang, T. Golden, Y. Lin and L. Angnes (Las Cruces, NM, USA) 65

Some aspects of the kinetics of formation of condensed 5-methyluracil films at the mercury/electrolyte interface
T. Wandlowski (Halle, Germany) 77

A galvanostatic study of electrochemical nucleation
A. Milchev (Sofia, Bulgaria) and M.I. Montenegro (Braga, Portugal) 93

On the composition of the passive film on nickel: a surface-enhanced Raman spectroelectrochemical study
C.A. Melendres and M. Pankuch (Argonne, IL, USA) 103

Electrocatalytic properties of amorphous nickel boride electrodes for hydrogen evolution reaction in alkaline solution
P. Los and A. Lasia (Québec, Canada) 115

XPS analysis of a lithium surface immersed in propylene carbonate solution containing various salts
K. Kanamura, H. Tamura and Z.-i. Takehara (Kyoto, Japan) 127

Synthesis and electrochemical analysis of *N*-substituted pyrrole compounds
K. Kondo, M. Suwa, A. Ozaki and K. Takemoto (Osaka, Japan) 143

Splitting of the DPP signal yielded by a single-step charge- transfer process with a very low transfer coefficient. Application to the determination of kinetic parameters for the reduction of Cd^{2+} and Zn^{2+} in dimethylsulphoxide
E. Muñoz, R. Rodríguez-Amaro, L. Camacho (Córdoba, Spain) and V. López (Madrid, Spain) 153

An in-situ IR spectroscopic study of the anodic oxide film on cobalt in alkaline solutions
A. Bewick, C. Gutiérrez and G. Larramona (Southampton, UK) 165

Influence of the supporting electrolyte and the pH on the electrooxidative activation of glassy carbon electrodes
D. Jürgen and E. Steckhan (Bonn, Germany) 177

Enhanced oxygen evolution on an electrodeposited and activated rhodium electrode in alkaline solution
M. Vuković and D. Čukman (Zagreb, Croatia) 195

An electrochemical and X-ray photoelectron spectroscopic study into the mechanism of Ti + W alloy etching in H_2O_2 solutions
J.E.A.M. Van den Meerakker, M. Scholten and T.L.G.M. Thijssen (Eindhoven, Netherlands) 205

Electrochemical reduction of folic acid reconsidered
R.C. Gurira, C. Montgomery and R. Winston (Grinnell, IA, USA) 217

Efficient electrocatalyst assemblies for proton and oxygen reduction: the electrosynthesis and characterization of polypyrrole films containing nanodispersed platinum particles
C.S.C. Bose and K. Rajeshwar (Arlington, TX, USA) 235

Electrode kinetics of oxygen reduction on gold in molten carbonate
S.-H. Lu and J.R. Selman (Chicago, IL, USA) 257

Electrochemical and photoelectrochemical reduction of oxygen at semiconductor electrodes in molten amides
S. Sampath and R. Narayan (Madras, India) 273

An investigation into the effect of ionic species on the deposition of tellurium and the formation of cadmium telluride
S. Dennison and S. Webster (Sunbury-on-Thames, UK) 287

Hydrogen and anion adsorption at platinum single crystal electrodes in phosphate solutions over a wide range of pH
S. Ye, H. Kita and A. Aramata (Sapporo, Japan) 299

Short communications

Cyclic voltammetry of a quasi-reversible system with a gaussian distribution of heterogeneous rate constants
J. Cassidy, W. Breen, A. McGee, T. McCormacx and M.E.G. Lyons (Dublin, Ireland) 313

The use of the Frumkin correction in the kinetics of the ion transfer across the interface between two immiscible electrolyte solutions. A comment on the paper by Girault et al.
Z. Samec and V. Mareček (Prague, Czechoslovakia) 319

Preliminary notes

Electro-organic reactions on organic electrodes. Part 17. Electrolysis using composite-plated electrodes: VI Electroreduction of aldehydes in hydration/dehydration equilibria
Y. Kunugi, Y. Ono and T. Nonaka (Yokohama, Japan) 325

Direct electron transfer of horse heart myoglobin at an indium oxide electrode
I. Taniguchi, K. Watanabe, M. Tominaga (Kumamoto, Japan) and F.M. Hawkridge (Richmond, VA, USA) 331

Use of the laser-desorption technique for the preparation of a mixed-thiol monolayer on a gold electrode
K. Takehara, S. Yamada and Y. Ide (Fukuoka, Japan) 339

Phase-transition dependent electron transfer of electrodes coated with multi-bilayer films of a ferrocene-carrying synthetic lipid characterized by cyclic voltammetry and chronocoulometry
N. Nakashima, S. Wake, T. Nishino, M. Kunitake and O. Manabe (Nagasaki, Japan) 345

Electrocatalysis in organized assemblies. Part X. Debromination of alkyl vicinal dibromides with neutral metal phthalocyanines in a bicontinuous microemulsion
M.O. Iwunze (Hartford, CT, USA), N. Hu and J.F. Rusling (Storrs, CT, USA) 353

The influence of hydrofluoric acid concentration on electroless copper deposition onto silicon
L.A. Nagahara, T. Ohmori, K. Hashimoto and A. Fujishima (Tokyo, Japan) 363

Dynamical solvent effect on the reduction kinetics of cobalt(III) anchored to a mercury electrode via a bridging ligand in water + DMF mixtures
J.S. Jaworski, Z. Kebede and M. Malik (Warsaw, Poland) 371
